

# NOPE!® Rat Snap Trap

## Product Description

**NOPE!® Rat Snap Traps** are break-back traps designed to kill rats and mice fast and reliably. **NOPE!® Rat Snap Traps** are easy to clean and reuse. **NOPE!® Rat Snap Traps** have a high-strength spring and a sensitive trigger mechanism, ensuring swift and humane rodent control.

## Benefits

- Powerful trap swiftly and humanely kills
- No environmental hazard
- Can be used repeatedly
- Easy to clean
- Welded kill bar
- Bait cup

## Properties

Colour	Black
Dimensions (mm)	140 (L) × 76 (W) × 95 (H) when armed

## Application Information

### Preparation

Before any treatment, the site should be monitored to identify the species, their preferred routes, the size of the infestation and the rodents' food and drinking sources.

Take preventative control measures, such as plugging entry and exit holes and removing food and drinking sources, which are readily attainable for rodents (e.g. spilled grain, food waste or leaks) to improve bait intake and reduce the likelihood of reinfestation. Apart from this, do not clean up the infested areas just before the treatment, as this only disturbs the rodent population and makes bait acceptance more difficult to achieve.

### Application

Read and follow the product information as well as any information accompanying the product or provided at the point of sale before using it.

When baiting the **NOPE!® Rat Snap Traps** for improved bait acceptance, use a **NON-TOXIC** bait that closely resembles the food source the rodents have been consuming such as: peanut butter, chocolate spread or cold meat. This increases the likelihood of them recognising and attempting to ingest the bait.

Rats are *neophobic*, which means they are very wary and cautious with new objects in their environment.

It is recommended to leave the **NOPE!® Rat Snap Traps** baited but **UNARMED** for a few days to allow the rats to become accustomed to the trap's presence and start consuming the bait. **NOPE!® Rat Snap Traps** should be revisited every couple of days to check for bait consumption. Once the bait is consumed, it is recommended to re-bait then **ARM** the **NOPE!® Rat Snap Traps**.

While mice are more inquisitive regarding new objects in their environment, it is also recommended to leave the **NOPE!® Rat Snap Traps** baited and **UNARMED** for a few days to allow the mice to become accustomed to the presence of **NOPE!® Rat Snap Traps**.

**Keep pets and children away from treated areas.** Place the **NOPE!® Rat Snap Traps** near the preferred routes of the rodents and securely attach to the surface before setting. After setting **NOPE!® Rat Snap Traps**, the traps should be inspected at least once a day and dead rodents should be removed during treatment.

If the bait is untouched, and the **NOPE!® Rat Snap Trap** has not been triggered after 35 days, the bait should be removed and replenished for sanitary reasons.

If the bait is still being consumed, the **NOPE!® Rat Snap Trap** is still capturing rodents and rodent activity is still observed after 35 days, consideration could be given to using a professional pest control service.

Rodents should be disposed of safely in a household waste bin with a secure lid to prevent access by wildlife and pets. Rodents can be disease carriers. Do not touch dead rodents with bare hands, use gloves or tools such as tongs when disposing of them.

Remove the remaining bait and/or the **NOPE!® Rat Snap Traps** at the end of the treatment period. After using **NOPE!® Rat Snap Traps**, either dispose of them or thoroughly clean the **NOPE!® Rat Snap Traps** using a disinfectant. Dispose of uneaten bait and the packaging in accordance with local requirements.

## Other Information

Apply only in areas that are not liable to submersion or becoming wet, i.e. protected from rain, floods and cleaning water. Do not contaminate foodstuffs, eating utensils or food contact surfaces. Keep away from food, drink and animal foodstuffs. For use only in indoor areas. Wash hands and exposed skin before meals and after use. All bats are protected under the Wildlife and Countryside Act 1981. Before treating any structure used by bats, consult The Bat Conservation Trust and the relevant statutory authority for guidance and advice: Natural England, NatureScot or Natural Resources Wales. Exclude all persons and animals during treatment.

Use **NOPE!® Rat Snap Traps** safely. Always read the label.
